CLEAR

C-LEVEL EAVESDROPPING AUDIT & REPORT

EAVESDROPPING DETECTION
with Counterespionage Consulting

A SPECIAL TSCM PROGRAM FOR LARGE ORGANIZATIONS

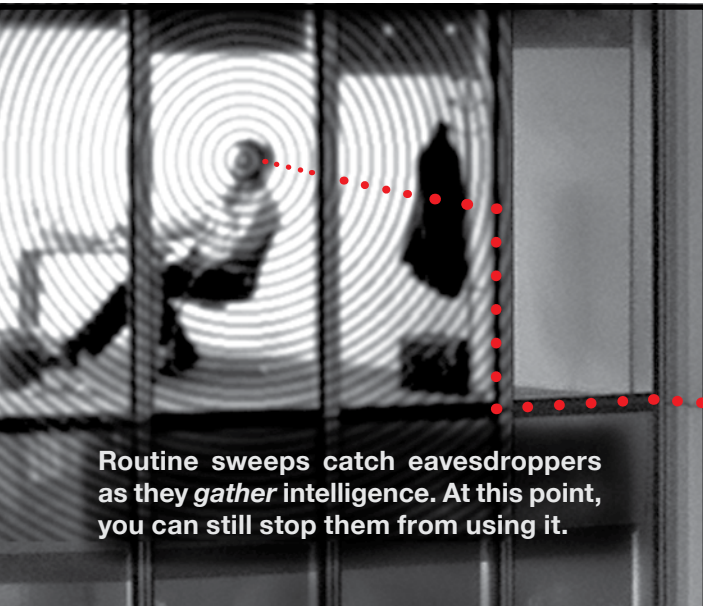

CLEAR

C-LEVEL EAVESDROPPING AUDIT & REPORT

A consulting service
for uncovering
eavesdropping
and espionage
in your organization
before your secrets are used
against you.

Business and government organizations routinely sweep their sensitive areas to clear them of eavesdropping devices.

Boardrooms, executive suites, conference rooms, off-site meeting locations, homes and vehicles are among areas audited.

Routine sweeps catch eavesdroppers as they *gather* intelligence. At this point, you can still stop them from using it.

CLEAR is simple...

Murray Associates has over thirty years experience protecting vital information and personal privacy.

Services are charged per day...
The more days used, the lower the cost.
Achieve maximum savings by adding subsidiaries and regional offices to your CLEAR program.

Protection throughout the organization is uniform, and makes economic sense.

Locating credible and *loyal* local vendors can range from difficult to impossible — especially on an international level. CLEAR solves this problem.

CLEAR solves problems...

Multiple vendor vetting, contracting, and scheduling is time-consuming and very expensive. High quality security is never attained. The end result is *lowest common denominator* effectiveness.

Governments have the right solution. They send *their own* trusted experts to detect illegal eavesdropping. Now, you can too.

CLEAR brings benefits...

- Cost-effectiveness.
- One point-of-contact.
- International coverage.
- Documented due diligence.
- Easy program management.
- Technical expertise assurance.
- *Proven* loyalty and trustworthiness.
- Extensive knowledge and contacts.
- Uniform procedures, reports and billing.

Bonus...
Insurance can't prevent losses; we can.

*"When was the last time
your office was cleared?"*
